Secretariat for PPP & Infrastructure

Preface

The Twelfth Five Year Plan recognises that adequate investment in the development of infrastructure is a prerequisite for higher growth. Accordingly, an investment of Rs. 55,74,663 crore has been projected during the Twelfth Plan, which is more than twice the investment of Rs. 24,24,277 crore anticipated during the Eleventh Plan. The Twelfth Plan also projects a share of 48 per cent of private investment against 36.61 per cent anticipated in the Eleventh Plan. This ambitious target for investment in infrastructure is constrained by the limited budgetary allocations, especially in view of the renewed emphasis on social sectors. As a result, the role of private investment in funding infrastructure projects assumes greater significance in delivering the Twelfth Plan targets.

The investment strategy of the Government primarily relies on promoting investment through a combination of public investment, private participation through Public Private Partnerships (PPPs) and stand-alone private investment. Since private investment would not be sustainable in financially unviable projects in rural infrastructure, irrigation and water resources management, inland waterways and in the economically or situationally disadvantaged regions, they would continue to be funded by public investment. For projects which

are financially viable, PPPs are increasingly becoming the preferred mode of project implementation, especially in sectors such as highways, airports, ports, railways and urban transit systems.

A number of initiatives taken during the Tenth and Eleventh Plans have resulted in the award of a large number of PPP concessions in highways and ports. In the airport sector, metro airports at Bangalore, Hyderabad, Delhi and Mumbai are being developed and operated by private entities through PPP concessions. In railways, concessions for the operation of container trains have been awarded to a number of competing entities. The progress made so far seems to suggest that India now stands at the forefront in attracting private investment in infrastructure as compared to other countries.

In the State sector also, several concessions in roads, ports and urban infrastructure have been awarded on PPP mode.

According to World Bank data on Private Participation in Infrastructure, India has been the top recipient of Private Participation in Infrastructure (PPI) activity during 2008-12. India alone accounted for almost half of the investment in new PPI projects in developing countries during 2011. A World Bank Report

maintained that India remained the largest market for PPI in the developing world.

Information on the status of PPP projects has been compiled as on March 31, 2013 in the three categories viz. completed projects, projects under implementation and projects in the pipeline. While the completed and under implementation projects signify the scale of success of the PPP programme, information on a large number of projects in pipeline suggests opportunities for investors in various sectors across the country.

The report is being published with a view to documenting the present status of PPP initiatives and for disseminating information aimed at further acceleration in the award of PPP concessions for development of infrastructure.

(Gajendra Haldea)

Adviser to Deputy Chairman

March 14, 2014

Planning Commission

Compendium of PPP Projects in Infrastructure

Introduction

1. Inadequate infrastructure has been recognised as a major constraint on rapid economic growth. The Eleventh Five Year Plan had, therefore, emphasised the need for massive expansion in investment in infrastructure based on a combination of public and private investments.

2. The Twelfth Five Year Plan continues the thrust on accelerating the pace of investment in infrastructure as this is critical for sustaining and accelerating the growth. Accordingly, the Twelfth Five Year Plan has projected an investment of Rs. 55,74,663 crore in infrastructure during the Plan period (2012-17), which is more than twice the investment of Rs. 24,24,277 crore anticipated during the Eleventh Plan (2007-12). The Twelfth Plan also projects a share of 48 per cent of private investment against 36.61 per cent anticipated in the Eleventh Plan.

3. Traditionally, infrastructure has been funded through public investment. However, in view of scarcity of budgetary resources and lack of capacity within the government to implement these ambitious programmes, the strategy of the government relies significantly on promoting investment through a combination of public investment and private participation. A substantial part of the investment in infrastructure sectors such as rural infrastructure, irrigation and water resources

management, inland waterways, and in the economically or situationally disadvantaged regions would have to come from the public sector. It is, therefore, essential to rely on private participation for funding the financially viable infrastructure projects in order to bridge the financing gap.

Box 1

Global Ranking in PPP

According to World Bank data on Private Participation in Infrastructure, the aggregate investment commitment in PPI projects was highest in India during 2008-12. A World Bank Report maintained that India remained the largest market for PPI in the developing world. In the South Asian region, India attracted over 90 per cent of regional investment.

4. During the Tenth and Eleventh Plans, considerable investment has been made in infrastructure by way of private participation. Typically, the mode of investment has been through Public Private Partnerships (PPP) involving investment by private entities through concession agreements which lay down the performance obligations to be discharged by the concessionaire. PPPs are increasingly becoming the preferred mode for construction and operation of commercially viable infrastructure projects in sectors such as highways, airports, ports, railways and urban transit systems. Box 1 indicates India's success and global ranking

in attracting private investment, while Box 2 reflects the quality and sophistication of the policy and regulatory framework.

Box 2

India Front-Runner in the PPP Race: ADB

According to a study by the Economic Intelligence Unit of the Economist commissioned by Asian Development Bank (ADB), while UK and Australia have been categorized as mature economies, India is positioned in the league of developed economies like Republic of Korea and Japan on implementation of PPP projects for infrastructure development. India has outscored China and Japan to rank second on PPP projects performance among the Asian nations and fourth in the Asia-Pacific nations. As per the Report, PPP development in India has been driven by strong political will and advances in public capacity and processes.

The Report states that PPP projects have a huge level of overall acceptance and use in India. It states that government agencies have a relatively high level of proficiency in PPP projects and that as a result of introduction of Model Concession Agreements, the risk allocation has been improving. In terms of finance, matters have improved, with a variety of initiatives (such as the creation of the Viability Gap Funding and the India Infrastructure Finance Company Limited) enabling greater participation of private finance in infrastructure.

5. During the past ten years, a number of initiatives were taken to promote PPPs. The

National Highways Authority of India (NHAI) awarded a large number of BOT and Annuity Concessions for construction and operation of national highways. In the port sector, the areas identified for private participation included leasing of port assets and construction and operation of terminals. In the airport sector, four metro airports at Bangalore, Hyderabad, Delhi and Mumbai are being developed and operated by private entities through PPP concessions. PPP initiatives have also undertaken to develop metro rail systems (Box 3).

Policy initiatives to promote private participation

6. Some of the key initiatives of the Central Government aimed at creating an enabling environment for promoting private participation in infrastructure are outlined below:

Cabinet Committee on Investment (CCI)

7. In order to provide enabling policy framework and efficient monitoring of PPP projects, the Government had constituted a Committee on Infrastructure (CoI) in August 2004 under the chairmanship of the Prime Minister, with the objectives of initiating policies that would ensure time-bound creation of world class infrastructure, delivering services matching international standards, developing structures that maximise the role of PPPs and monitoring progress of key infrastructure projects to ensure that established targets are realised.

In July 2009, the CoI was replaced by the Cabinet Committee on Infrastructure chaired by the Prime Minister to give further impetus to the initiatives for development of infrastructure. It approved and reviewed policies and projects across infrastructure sectors. It also considered and decided on financial, institutional and legal measures required to enhance investment in infrastructure.

8. In January 2013, the Government constituted the Cabinet Committee on Investment (CCI) under the chairmanship of the Prime Minister. The key functions of the Committee include; to identify key projects involving investments of Rs. 1000 crore or more or any other critical projects required to be implemented on a time-bound basis in infrastructure, manufacturing etc.; to prescribe time limits for requisite approvals and clearances by concerned Ministries/ Departments; monitor the progress of identified projects; to review implementation of projects delayed beyond stipulated timeframe; to review procedures followed by Ministries/Departments to grant/refuse approvals and clearances; to take decision on grant/refusal of approvals/ clearance of unduly delayed specific projects; to decide measures for expeditiously granting/ refusing approvals/clearance in identified sectors including simplification of rules/ procedures followed by respective Ministries/ Departments and require statutory authorities to discharge functions and exercise powers for promoting investment and economic growth. With the constitution of the Cabinet Committee on Investment, the Cabinet Committee on Infrastructure has been merged with the Cabinet Committee on Economic Affairs (CCEA).

Box 3

Hyderabad Metro Rail Project

Hyderabad Metro Rail Project is presently under construction with a total project cost of Rs. 12,132 crore. The project is spread over three high density traffic corridors of Hyderabad with a total length of 71 km and is being developed on Design, Build, Finance, Operate and Transfer (DBFOT) mode. The project was awarded to the successful bidder for a VGF of Rs.1,458 crore which will be provided by the Central Government while the remaining investment will be made by the private sector concessionaire. This is the single largest private investment in a PPP project in India. It is also one of the largest metro rail projects built and operated by a private entity anywhere in the world. The project demonstrates how large volumes of private capital can be deployed in public projects in a transparent, efficient and competitive manner. The concession has been awarded on the basis of the Model Concession Agreement for Urban Transit developed by the Planning Commission.

Public Private Partnership Appraisal Committee (PPPAC)

9. With a view to streamlining and simplifying the appraisal and approval process for PPP projects, a Public Private Partnership Appraisal Committee (PPPAC) has been constituted under the chairmanship of Secretary, Department of Economic Affairs and Secretaries of Planning Commission, Department of

Expenditure, Department of Legal Affairs and the concerned Administrative Department as its members. The project proposals are appraised by the Planning Commission and approved by the PPPAC. Until March 31, 2013, the PPPAC has approved 338 projects involving an investment of Rs. 2,82,951 crore.

India Infrastructure Finance Company Limited (IIFCL)

10. India Infrastructure Finance Company Limited (IIFCL) was set up as a non-banking company for providing long-term loans for financing infrastructure projects that typically involve long gestation periods. The IIFCL lends up to 20 per cent of the project costs and one-half of its lending can also be in the form of subordinated debt, which often serves as quasi-equity. IIFCL raises funds from domestic and overseas markets on the strength of Government of India guarantees. Until March 31, 2013, IIFCL had approved 300 projects with a total investment of Rs. 3,52,047 crore, of which IIFCL lending will be Rs. 51,887 crore. It had disbursed Rs. 26,582 crore as on March 31, 2013.

11. The IIFCL is expected to graduate during the Twelfth Plan from the existing role of a normal lender to that of a catalyst mobilising additional resources for financing of infrastructure. This could be achieved by IIFCL providing guarantees for bonds issued by private infrastructure companies rather than expanding its direct lending operations. This would help attract funding from insurance and

pension funds which do not otherwise lend to projects under construction. Further, IIFCL may also substitute its take-out financing scheme with an Infrastructure Debt Fund (Box 4).

Box 4

Infrastructure Debt Funds

Infrastructure projects are capital intensive and have long payback periods, and, therefore, require long-term funds at comparatively low costs. Infrastructure projects in India are financed mainly by commercial banks, as insurance and pension funds do not normally lend for new projects. The present bond market lacks depth to address the needs for a long-term debt. With a view to overcoming these shortcomings, Infrastructure Development Funds (IDFs) are being set up for channelizing long-term debt from domestic and foreign pension and insurance funds, as well as from other sources. These IDFs will also carry adequate credit enhancement in terms of implicit government guarantees for repayment of debt. The RBI and the SEBI have already laid down regulatory framework for the IDFs.

Besides augmenting debt resources for financing infrastructure, the IDFs would refinance PPP projects after their construction is completed and operations have stabilised. By refinancing bank loans of existing projects, the IDFs are expected to take over a significant volume of the existing bank debt, and this will release an equivalent volume of fresh lending for infrastructure projects.

Empowered Committee/Institution (EC/EI)

12. An institutional framework comprising an inter-ministerial Empowered Committee has been established for the purpose of appraising and approving projects for availing the Viability Gap Funding (VGF) grant of up to 20 per cent of the cost of infrastructure projects undertaken through PPP. Up to May 31, 2013 it had approved 150 projects in the State sector involving a total capital investment of Rs. 78,453 crore.

Viability Gap Funding (VGF) Scheme

13. Recognising that the externalities engendered by infrastructure projects cannot always be captured by project sponsors, a Viability Gap Funding (VGF) scheme was notified in 2006 to enhance the financial viability of competitively bid infrastructure projects which are justified by economic returns, but do not pass the standard thresholds of financial returns. Under the scheme, grant assistance of up to 20 per cent of capital costs of infrastructure projects is provided by the Central Government to PPP projects undertaken by any Central Ministry, State Government, statutory entity or local body, thus leveraging budgetary resources to access a larger pool of private capital. An additional grant of up to 20 per cent of the project costs can be provided by the sponsoring authority. In the case of National Highway projects, the entire VGF is provided by NHAI from the cess revenues transferred to it by the Government. The aforesaid VGF support for each project is determined through competitive bidding. As on March 31, 2013, the

Government has approved VGF for 483 projects with investment of Rs. 3,66,586 crore.

Advisory Services

14. Implementation of PPP projects requires appropriate advisory services in terms of preparation of project agreements, structuring of projects, etc. The Planning Commission has operationalised a scheme for technical assistance to project authorities by providing consultants for projects. Ministry of Finance has also created an India Infrastructure Project Development Fund (IIPDF) to provide loans for meeting the development expenses, including the cost of engaging consultants for PPP projects.

Model Documents

15. The use of standard documents streamlines and expedites decision-making by the authorities in a manner that is fair, transparent and competitive. All projects that are based on model documents benefit from fast-track appraisal and approval. The Model Concession Agreements (MCAs) published by the Planning Commission for various sectors are listed in Box 5. MCAs for PPPs in electricity distribution, hospitals, micro irrigation and Industrial Training Institutes are under different stages of preparation.

16. Standardised guidelines and model documents that incorporate key principles and best practices relating to the bid process for PPP projects have also been developed. Guidelines for the pre-qualification of bidders along with a Model Request for Qualification

Box 5

Model Concession Agreements for PPP Projects

- *National Highways*
- *State Highways*
- *Operation & Maintenance of Highways*
- *National Highways (Six Laning)*
- *Transmission of Electricity*
- *Power Purchase Agreement (DBFOT)*
- *Power Supply Agreement (DBFOO)*

- *School Education (Central)*
- *School Education (States)*
- *Annuity Projects*
- *EPC Agreement for Highway*
- *EPC Agreement for Railway Projects*

(RFQ) document have been approved by the CoI and issued by the Ministry of Finance for application to all PPP projects. Guidelines for inviting financial bids on the basis of a Model Request for Proposal (RFP) document have also been published. Similar model documents for procuring the services of consultants and advisers have also been published. The model bidding documents approved and published for the PPP Projects are listed in Box 6.

Box 6

Model Bidding Documents for PPP Projects

- *Model Request for Qualification (RFQ) for PPP Projects*
- *Model Request for Proposal (RFP) for PPP Projects*
- *Model Request for Proposal (RFP) for Selection of Technical Consultants*
- *Model Request for Proposal (RFP) for Selection of Legal Advisers*
- *Model Request for Proposal (RFP) for Selection of Financial Consultants & Transaction Advisers*
- *Model Request for Proposal (RFP) for Selection of Transmission Consultants*

Guidelines and Manuals

17. The Government has identified several areas for reform of policies and processes. The MCA specifies the standards and specifications to which the projects should be constructed and maintained. These are laid down in detail in the Manuals of Standards and Specifications.

The Planning Commission and Indian Road Congress have published Manuals of Specifications and Standards for Two-Lane and Four-Lane Highways through PPPs. A number of Guidelines and Manuals published for PPP projects are listed in Box 7.

Box 7

Guidelines and Manuals

- *Guidelines for Financial Support to PPPs in Infrastructure (VGF Scheme)*
- *Guidelines on Formulation, Appraisal and Approval of PPP Projects (PPPAC)*
- *Guidelines for Establishing Joint Ventures in Infrastructure*
- *Guidelines for Monitoring of PPP Projects*
- *Scheme for Financing Infrastructure Projects through the IIFCL*
- *Manual of Specifications & Standards for Two-laning of Highways*
- *Manual of Specifications & Standards for Four-laning of Highways*
- *Monitoring of PPP Projects*
- *Budgetary Ceiling on Annuity Projects*

Reports

18. Based on inter-ministerial deliberations, a number of Reports have been published and their recommendations adopted. These are listed in Box 8.

19. The entire effort, as brought out in the paragraphs above, has been towards

Box 8

Reports

- *Financing of the National Highways Development Programme (NHDP)*
- *Financing Plan for Airports*

creation of an enabling framework within which PPP projects can be awarded and implemented efficiently without compromising on government and user interests. The state governments are gradually adopting similar institutional arrangements for accelerating the pace of PPP in various sectors.

STATUS OF PPP PROJECTS IN THE CENTRAL SECTOR

20. This volume enlists completed and under implementation projects under PPP mode and also in the pipeline. A collective summary of PPP projects in the Central and State sectors is at Annex-I. It indicates that while 693 projects with an investment of Rs. 1,61,427 crore have been completed, 794 projects with an investment of Rs. 4,68,982 crore are under implementation. Another 1,076 projects involving an investment of Rs. 5,92,120 crore are in the pipeline.

21. The Constitution of India delineates the subjects on which the Centre and the States can legislate and frame policies. The key infrastructure sectors such as railways, national highways, airports and major ports are Central subjects and, therefore, the Central Government has been initiating measures to meet the burgeoning demand for infrastructure in these sectors. Considerable development has taken place in these sectors in the last few years. Apart from public sector projects, numerous PPP projects have also been awarded, and in many cases, these PPP projects are in operation. An attempt has been made to compile sector-

wise information of all PPP projects under the Central sector in Annexes II, III and IV under three categories viz. completed projects, projects under implementation and projects in pipeline respectively. The information pertaining to PPP projects in these sectors have been sourced from the four Central Ministries viz. Ministry of Road Transport & Highways, Ministry of Shipping, Ministry of Civil Aviation and Ministry of Railways as on March 31, 2013. In the Central sector, a total of 111 PPP projects involving an investment of Rs. 51,812 crore have been completed as on March 31, 2013, 195 PPP projects with an investment of Rs. 1,92,677 crore are currently under implementation and another 65 PPP projects with an estimated investment of Rs. 1,24,589 crore are in the pipeline.

Completed Projects

22. As on March 31, 2013, 75 PPP projects of national highways with an investment of Rs. 31,404 crore and 29 PPP projects in the port sector with an investment of Rs. 12,964 crore have been completed. Railways have completed 4 port connectivity projects involving an investment of Rs. 1,561 crore. In the civil aviation sector, 3 airports involving a total investment of Rs. 5,883 crore have been completed through PPP mode at Cochin, Bangalore and Hyderabad. A list of PPP projects completed in the Central sector is at Annex-II.

Projects under implementation

23. At present 161 projects with an

investment of Rs. 1,55,438 crore are currently under implementation in the road sector, while in the port sector 29 projects involving an investment of Rs. 8,561 crore are currently under implementation. The airports at Delhi and Mumbai are being upgraded with an investment of Rs. 25,237 crore. A total of 3 projects with an estimated investment of Rs. 3,441 crore are under implementation in the railway sector. A list of PPP projects under implementation in the Central sector is at Annex-III.

Projects in the pipeline

24. It is expected that another 18 national highways projects envisaging an investment of over Rs. 25,377 crore would be awarded soon. 20 port projects with an estimated investment of Rs. 17,420 crore are also in the pipeline. 15 PPP projects in the airport sector with an estimated cost of Rs. 23,692 crore are also in the pipeline. The Ministry of Railways plans to develop 12 railway projects in the PPP mode at an estimated cost of Rs. 58,100 crore. A list of PPP projects in pipeline in the Central sector is at Annex-IV.

STATUS OF PPP PROJECTS IN THE STATE SECTOR

25. In a federal country like India, active participation of State Governments is essential for development of world class infrastructure, especially in the sectors assigned to the States by the Constitution. These include state highways, non-major ports and urban infrastructure. Electricity is a concurrent

subject where distribution and intra-state transmission is entirely with the states while bulk of the generation is also with the states. The State Governments are implementing several infrastructure projects through the PPP mode in all these sectors. State-wise details of the PPP projects under the three categories viz. completed projects, projects under implementation and projects in pipeline are at Annex-V, Annex-VI and Annex-VII respectively. Information received from States/UTs includes 582 completed PPP projects in different sectors with a total investment of Rs.1,09,615 crore while 599 PPP projects are currently under implementation with an estimated investment of Rs. 2,76,305 crore. In addition, 1,011 PPP projects are in the pipeline involving an estimated investment of Rs. 4,67,531 crore.

Completed Projects

26. 166 road projects with an investment of Rs. 22,445 crore and 28 non-major ports with an investment of Rs. 33,162 crore have been completed through PPP in the state sector. 179 urban infrastructure projects have been executed through the PPP mode involving an investment of Rs. 7,568 crore. Of the total of 582 projects completed in States, Rajasthan has completed a maximum number of 126 projects, followed by Andhra Pradesh with 103 projects and Maharashtra with 88 projects. The largest numbers of projects have been completed in the urban infrastructure sector followed by road sector. State-wise completed PPP projects are tabulated in Annex-V.

Projects under implementation

27. In the road sector, 187 projects with an investment of Rs. 65,038 crore and 18 non-major ports projects with an investment of Rs. 28,411 crore are under implementation. 144 urban infrastructure projects with an investment of Rs. 47,496 crore are also currently under implementation. State-wise PPP projects under implementation are tabulated in Annex-VI.

Projects in pipeline

28. 200 PPP projects in the road sector envisaging an investment of Rs. 71,614 crore are in the pipeline. Another 39 PPP projects with an estimated investment of Rs. 40,620 crore in non-major ports and 420 PPP projects in urban infrastructure sector envisaging an investment of Rs. 2,57,196 crore are also in the pipeline. State-wise PPP projects in the pipeline are tabulated in Annex-VII.
